

Members' Seed Pack Request

Each year, we offer free seed to [Garden members](#) (Individual level through Director's Circle) through our Members' Seed Distribution Program. We're excited to return to a choice-based method of seed selection in 2022. Current members may select up to eight packets of seed from 30 available species. Please also select three alternates, as quantities of some species are limited. Orders will be filled on a first-come, first-served basis. Seed distribution will run through October, or until supplies last.

[Explore the available species online here](#) (click on 'detail' to the right of each plant for more information), or view a printable PDF list of this year's species [with images](#) or [without images](#).

Many native seeds require a period of cold stratification before they'll germinate: you can let nature do the work in late fall, or you can start them now by stratifying them in the fridge. Read more in our [Growing Instructions](#).

Seed Selections

You may select the same species more than once. If you want fewer than eight seed packs, you can leave the selection for the remaining packs blank.

Want to review the options? See images and descriptions of each of the species on the list [here](#). Click on "Common" to sort alphabetically by common name, and click on "detail" to the right of a plant's photo to read a longer description.
